Skills

Languages: C++, Python (AI/ML, Data Analysis), SQL, HTML, CSS

Technologies & Tools: AWS (EC2, Lambda, S3), MySQL, Excel, Pandas, NumPy, Matplotlib, Seaborn, OpenCV, Flask, Django, TextBlob, YOLOv8, MQTT, JSON, Dash, Tkinter, Google Gemini API, Jupyter Notebook, VS Code, Git/GitHub

Work Experience

Elevate Labs, Bengaluru

Sept 2025 - Present

Python Developer Intern

- Completed an intensive 2-week daily task phase, progressing from beginner to advanced projects including CLI Calculator, REST API development with Flask, and Portfolio Website creation, building a strong foundation in Python programming, web development, and backend integration.
- Currently engaged in the project phase, applying advanced skills in Python, Flask, AI, Data Science, and cloud technologies, developing real-world applications and gaining hands-on experience in end-to-end software and AI solution development.

TheCoreSystems, Chandigarh

July 2025 - Aug 2025

Industrial Trainee

- Completed an intensive training program in Python with AI, Data Science, and Cloud Computing (AWS), gaining expertise in advanced libraries such as Pandas, NumPy, and Matplotlib for data analysis and visualization.
- Developed and deployed multiple real-time AI and IoT projects, including Nextcloud deployment on AWS, Real-Time Object Detection using MobileNet SSD & YOLOv8, and IoT Dashboards using MQTT, JSON, and Dash, integrating data from live sensor streams.
- Implemented innovative solutions like Real-Time Object Detection with TTS (Text-to-Speech) using OpenCV and pyttsx3, demonstrating strong problem-solving, model optimization, and hands-on cloud deployment skills.

OOPS Institute of Computer Technology, Kurukshetra

July 2024 - Aug 2024

Industrial Trainee

- Acquired hands-on experience in Python, Tkinter, and SQL, developing interactive GUI-based applications with real-time database integration to enhance user efficiency and data management.
- Engineered multiple end-to-end projects, including a Bank Management System, Hospital Management System, and Library Management System, showcasing strong problem-solving, design, and implementation skills in full-stack application development.

Education

Seth Jai Prakash Mukand Lal Institute of Engineering And Technology, Radaur

July 2023 - Present

B.Tech in Computer Science Engineering

Pursuing a comprehensive program emphasizing Data Structures, Databases, Operating Systems, Advanced Data Structures, and Discrete Mathematics, with a strong focus on problem-solving, algorithmic thinking, and real-world application development.

Wisdom World School, Kurukshetra

2022 - 2023

Senior Secondary

Specialized in Physics, Chemistry, and Mathematics (PCM), building a strong analytical and quantitative foundation essential for computer science and data-driven problem-solving.

Project Work

- Sales Forecasting Dashboard:** Predicted future sales using Python, Pandas, and Scikit-learn, and visualized insights with Matplotlib/Power BI.
- Customer Churn Prediction:** Built an ML model using Logistic Regression and Random Forest to identify at-risk customers.
- COVID-19 Data Analytics Dashboard:** Analyzed global datasets with Python and SQL and deployed an interactive dashboard on AWS.

Awards and Certificates

- Software Engineering Job Simulation by JPMorgan Chase & Co.
- Awarded ₹25,000 by Nalin Gupta for demonstrating leadership and exceptional influence.
